

MONIER

THE ROOF NEWS

SEPTEMBER'08

Issue 4

For monsoons, is there a perfect roofing solution? One that spares you the headache of leakages?

Of course! Check out our complete solution yourself

Conventional way....with mortar

MONIER way....with Wakaflex

WAKAFLEX – THE ABUTMENT SOLUTION

Available in both colors of Orange & Black, it is compliant with both Elabana and Coloroof Monier roof tiles.

With the requirement of considerably less installation time and lower costs of storage and transportation. Also, no specialized labour needs to be hired.

Five layered laminate, with adhesive, Wakaflex is easy to lay , adding aesthetic value to the roof by avoiding the use of mortar & metal flashing roof materials.

Taking the shape of the tile on which it is laid, a reinforced seal is created, which prevents any water penetration at joints, overlaps and edges.

ROOFS ARE NOT ONLY ROOF TILES !

The Indian roofs are often quite complex with many slopes and many junctions which are the main sources of leakages.

As a worldwide leader in roofing solutions, Monier developed a range components that make the full roof watertight and performing. Our **roof components** come on specific areas like “links between roofs and walls”, “valleys areas between two parts of roofs” etc... which are known to be sources of leakages and, then, of trouble for our customers.

To fight against the aggressions of the weather (combination of wind and rain) on your roof, we can provide you with a full roof approach, which is unique in the Indian market.

We hope this newsletter will inform you more about our different offers.

Enjoy a **performing and trouble-free roof** under the monsoon with MONIER range of roof components !

Xavier Janin
CEO India

ROOF OF THE MONTH

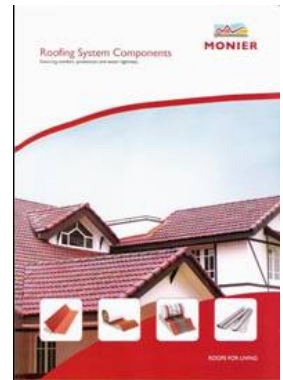

This beautiful house has got the beauty enhancement from MONIER through the **Elabana Golden brown tiles**, giving a jewelry like appearance to the house.

Its light colored roof will contribute to fight naturally against the heat of South India, via its better light reflection

Send your MONIER roof picture with details to priyanka.jha@monier.com

Are you troubled by water leakage and bad aesthetics at the joint of two roofs?

MONIER Roofing has the ready solution for you

Conventional way....with mortar

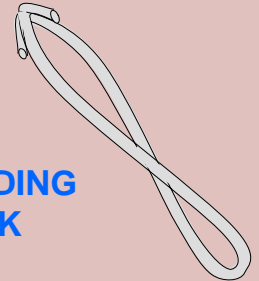

MONIER way..with Valley Metal Sheet

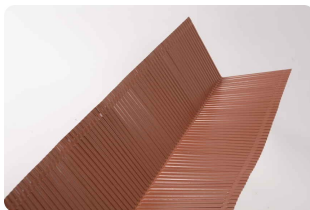

**New launch
in India**

...to set you free from tile theft fear

TILE HOLDING HOOK

- For fixing tiles on open structures
- Prevents uplifting of tiles during heavy winds
- Prevents theft and/or intrusion of monkeys

Valley Metal Sheet

Present in two colors: orange and black, it goes in sync with the tile color, providing aesthetic beauty.

Valley Metal Sheet can be bent on site to adapt to the angle of the roof making it perfectly suitable with any slope and easy to lay

Preventing water back-flow with the help of the ribs, it provides complete water tightness.

MONIER provides a whole set of Roof System Components comprising of Wakaflex, Valley metal Sheet, Radiant barrier & Compact Roll, giving a complete Water tight and aesthetic Roof solution without the use of mortar
